Employment Visa

Notice Period : 30 days

SKILLS

Core Competencies
Supply Chain & AI Analytics
Demand Planning / Forecasting
Data Governance
Data Modeling & DAX Optimization
ETL Data Integration & Frameworks
Logistics Performance Analytics
S&OP (Sales & Operations Planning)
Stakeholder Management

Business Intelligence
Power BI
DAX
Power Query
Tableau

Data Analysis
SQL
Python (Pandas, NumPy)
Data Pipeline / ETL Pipeline

Analytics & AI
Predictive Analytics
A/B Testing / Experimentation
Demand Forecasting

Data Platforms
SAP S/4HANA
Databricks
Azure Data Warehouse
Snowflake / BigQuery
Power Automate (advanced)
Microsoft Fabric

Supply Chain and Business Intelligence Analyst with **5+ years** of experience in **analytics, logistics performance monitoring, and data-driven operational improvement**. Experienced in developing **Power BI dashboards, KPI frameworks, and automated reporting solutions** supporting large-scale supply chain operations across the Middle East.
Skilled in **data modeling, SQL analytics,ERP and ETL integration** using platforms such as **SAP, Databricks, and Azure Data Warehouse**, processing **1M+ records monthly** to deliver insights for operational teams and senior leadership. Currently expanding into **AI-driven supply chain analytics**, including predictive inventory modeling and anomaly detection.

EXPERIENCE

Supply chain Analyst, *Gulf Marketing Group (Trilogi Logistics LLC)*
09/2025 – Present | Dubai , United Arab Emirates

- Developed **10 operational and 2 executive Power BI dashboards** supporting supply chain operations across **UAE, Saudi Arabia, Bahrain, and Egypt**, enabling decision-making for **150+ users and 8+ senior leadership stakeholders**.
- Designed and implemented **Warehouse Throughput dashboards** across multiple locations, improving visibility into processing volumes and capacity utilization, contributing to a **~18% improvement in throughput monitoring accuracy**.
- Built **Inbound Operations Health dashboards** tracking **PO Fill Rate, Dock-to-Stock TAT, and clearance ageing**, enabling early identification of bottlenecks and reducing inbound processing delays by **~12–15%**.
- Developed **Outbound & Fulfilment performance dashboards** focused on **OTIF (On-Time In-Full)** metrics, improving delivery performance tracking and supporting **~10% improvement in SLA adherence**.
- Engineered scalable data models integrating **1–1.5M records/month** from **SAP HANA, SAP EWM, SAP BI, Databricks, Azure Data Warehouse, SQL, and Excel**, enabling unified cross-system analytics.
- Optimized reporting performance using **incremental refresh and Power Automate**, reducing dashboard refresh time from **4–5 hours to 15–45 minutes (~80% reduction)** and eliminating manual interventions.
- Developed automated **executive analytics summaries and conducted supply chain market research**, delivering insights on **cold chain logistics, sustainability, and global supply trends**, supporting leadership discussions and strategic planning initiatives.

Senior Risk Associate, *Amazon Development Centre*
11/2021 – 08/2025 | Bengaluru , India

- Developed enterprise **Power BI dashboards monitoring operational KPIs, service delivery metrics, and performance trends** across large-scale operational programs.
- Automated reporting pipelines using **Power BI, SQL queries, and Excel macros**, improving report delivery efficiency and reducing manual analysis effort by **60%**.
- Consolidated multi-source operational datasets to create **centralized analytics reporting systems**, improving data visibility for program management teams.
- Led data coaching initiatives to improve **data literacy across operational teams**, enabling teams to interpret performance metrics and identify operational improvement opportunities.
- Delivered **executive-ready analytics reports and visual presentations**, enabling senior leadership to monitor operational performance and make strategic decisions.
- Identified data quality issues across reporting systems and implemented **data reconciliation frameworks**, improving reporting accuracy and consistency.

Assistant Manager, *Godrej & Boyce Mfg. Co. Ltd*
08/2019 – 11/2021 | Bengaluru , India

- Managed **₹50+ crore corporate infrastructure projects**, overseeing scheduling, risk management, and cross-functional coordination for enterprise clients including Accenture, Infosys, and ISRO.
- Developed **Power BI and Tableau dashboards monitoring project delivery performance, cost variance, and timeline adherence**, improving visibility for leadership teams.
- Conducted risk assessments and implemented mitigation strategies ensuring successful delivery of complex corporate projects.
- Led cross-functional teams across engineering, procurement, and project management to deliver projects **within timeline and budget constraints**.

ACCOMPLISHMENTS

'Beyond Awarded' (Quarterly Award given to 1 person out of 300 Team),
Amazon development Center
2025
Multiple process. improvements using Automation and Quality Analytics.

9 Times 'Ace of Spades' equivalent to employee of the month awardee,
Amazon development Center
2024

Project Management Team of the Year 2020(Bangalore Branch),
Godrej and Boyce Mfg Co LTD
Led a team that was Awarded

KEY ANALYTICS PROJECTS

Warehouse Throughput Dashboard
Developed a Power BI dashboard to monitor **warehouse throughput, processing volumes, and capacity utilization** across multiple locations, enabling performance benchmarking and improving operational visibility, contributing to **~15–18% improvement in throughput tracking accuracy**.

Inbound Operations Health Dashboard
Built an inbound analytics dashboard tracking **PO Fill Rate, Dock-to-Stock TAT, and clearance ageing**, enabling early bottleneck identification and reducing inbound processing delays by **~12–15%** through data-driven interventions.

Executive Supply Chain Analytics Summary
Created an automated executive reporting framework consolidating insights from multiple dashboards into **monthly leadership presentations**, enabling strategic decision-making across regional supply chain operations.

Predictive Inventory & Fill Rate Model
Developing a predictive analytics model to forecast **fill rate performance based on demand patterns and operational variables** using **GPT-4o which is** aimed at improving inventory planning and supply chain responsiveness.

Anomaly Detection for Supply Chain Data using AI
Building anomaly detection logic to identify **data inconsistencies, operational exceptions, and missing records**, using **GPT-4o ,** improving data reliability and proactive issue resolution.

CERTIFICATES

PL-300: Power BI Data Analyst — Microsoft • **Advanced Excel Certification** — Microsoft • **Advance Analytics** — Amazon

EDUCATION

University Visvesvaraya College of Engineering, BU Affiliated,
Bachelors in Engineering Mechanical
07/2015 – 07/2019
